

## **MAKING ACCESSIBLE HEALTHCARE A BASIC HUMAN RIGHT**

**[www.remus-health.com](http://www.remus-health.com)**

### **Our Vision**

- We believe access to healthcare should be a basic human right for all humanity regardless of their economic circumstances.

### **The Challenge**

- In 2018 nearly 40% of the world's population have no access to healthcare; this represents nearly 3.2 billion people.
- In many developing nation states there is no functioning national health programme or service of an accredited form. Only those who have the means to pay for healthcare in these countries receive any form of assistance.
- Many developing nation states lack the financial and technical resources to address this challenge.
- Sadly, in a number of these nation states, there is also a lack of political will to address such a challenge and so progress has been slow to non-existent.

### **An Innovative Solution**

- Remus Health has created the first "Turn Key" Global - National Health Services (GNHS).
- Targeting 30 developing nation states across the world to reach, over the next 20 years, 400 million people and provide them with affordable healthcare.
- Through our Private Public Investment Partnership (PPIP) with National Governments, Remus will design, build, operate and transfer a tailor-made National Health Service.
- The service will be delivered through "Smart Healthcare Cities" (SHC's) providing accredited medical services to up to 1 million people per year in local communities. In addition, the service will provide an on-line health service through our "Telemedicine Application" accessible to any individual 24/7/365.

### **The World's First Accredited Healthcare Currency**

- Remus has created the world's first "Asset Backed Healthcare Currency" to assist healthcare users pay for their medical needs.
- Remus will apply to the foremost regulatory authorities for their approval of this new currency as an accredited security with all the pre-requisite protection for investors.
- A predetermined amount of this currency will be donated to healthcare users every year.

### Our Humanitarian Credentials

- Our 2 for 1 donation programme means for every Remus Coin sold 2 are donated to those most in need of assistance.
- Every healthcare user will be able to use his or her allocation of Remus Health Tokens to pay for the services they need at the Smart Healthcare Cities or for on line services
- We place healthcare in the hands of healthcare users not institutions or corporations.
- Remus will donate over 400 billion United States Dollars over the next 20 years to sustain its assistance to healthcare users all over the world.

### CEO Comment

**“A great man once said we make a living by what we earn, but we make a life by what we give”.** In 2018 Remus Health begins its journey to help those most in need in a safe and practical way. By making healthcare accessible we seek to give all humanity the opportunity to live a healthy and enjoyable life. In our minds this should be a basic human right not a privilege for the affluent few. The journey will be long and full of many challenges but every person we can help and every life we can save we hope to help restore those values of kindness and charity to your fellow man which has made humanity so great over centuries. This can be done and will be done. Join us in this journey and contribute to a more humane society for those that follow us.
