www.remusinvestment.com

Overview

Firstly, a HAPPY & SAFE NEW YEAR to all

2 years into our 25-year programme and much has been done to prepare the ground for our healthcare initiative. Our Petroleum Asset acquisition work proceeds at pace with a sensible and verified pipeline of opportunities we will progress in 2020. We have in addition to Africa, targeted oil producing assets in the North Sea (UK, NL and DK) as well as assets in the Gulf of Mexico, USA. Our focus will remain in these areas for the majority of 2020.

Remus is in discussion with a WORLD CLASS marketing and PR agency in New York City, USA with a view to handing over the management of the Remus Coin to this agency as we move to our much-awaited launch and the subsequent marketing globally of the Remus Coin Programme. It is the most sensible approach to take to reach a larger community of investors and users worldwide whilst providing 24/7/365 cover, which we will need as momentum builds up on the programme.

Key Strategic Goals Revisited

Our targets for 2019 have been updated as follows: -

- We have applied for 2 petroleum licenses in Ghana and have begun discussions with the Ghanaian authorities. The reserves attached to these two licenses amount 490mmbo. The process to successful acquisition will be concluded by July 2020 with Parliamentary approval.
- In collaboration with our newly found marketing agency we will seek to conduct a professional global launch to Remus Coin within 1st July 2020. The exact details of the launch and the marketing initiative we are designing with our Partners will be disclosed under separate cover within the March 2020 Newsletter. Our target is to reach an audience of 1.0 million people ahead of the launch from which we hope to have 10,000 investors by this time.
- Remus will hold petroleum Reserves worth circa \$20BN USD by the end of 2020. Providing the financial base for the deployment of our GNHS Programme. This will, with a 40% profit allocation, take Remus Coins value to circa \$6.0/coin by year end.

Remus Health

For the first 6 months of 2020 Remus will seek to establish the following within its Remus Health Organisation: -

- Conclude the recruitment of a core Executive team of 6 key professionals with relevant operational expertise. This is WIP and our search for seasoned executives to add further experience and expertise to the team continues.
- Remus will conclude a PROTOTYPE Telemedicine Application which will be tailored to the needs of the countries we have targeted. Specifically, in terms of specific disease prognosis and on line consultations. In addition, we will seek solutions to digital connectivity in remote locations, a common challenge in developing countries.
- The 2nd half of 2020 we will seek to have a PROOF OF CONCEPT design for our SMART HEALTHCARE CITIES ensuring the facility can be upgraded to meet local challenges. We are seeking and have found expertise in this area. This is NOT just about building a HOSPITAL it is a suite of facilities digitally linked using IOT for rapid and effective response in terms of patient care.

Remus Petroleum – Acquisition of Petroleum Assets

As many of you know this is the ENGINE ROOM for all Remus activities and as such mission critical to our success. Over the last 2 years we have focused 80% of our efforts in sourcing, screening, and developing a pipeline of targeted assets.

The amount of technical evaluation conducted as been significant and complex. We have done well in this process and are beginning to gain momentum in our targeted geographies. There are many moving parts to acquiring and developing oil assets with significant financing involved. The experience of the Remus Team is notable.

To ease this journey moving forward, over 2020, Remus will deploy a Petroleum Development Fund with capital under management of \$1.0BN USD, called REMUS HORIZONS. The purpose of the fund is to ensure EQUITY CAPITAL is available to make our targeted acquisitions in a timely and effective manner. We are working with established and accredited PARTNERS in NYC to structure the Fund and put in place a fund management team with suitable credentials. The legal and regulatory compliance for such a vehicle is significant. Our PARTNERS have established such funds previously and bring the necessary STRUCTURING EXPERTISE Remus will need. The Fund will be in place and operational by Feb 2021.

Remus has over the 2nd half of 2019 established working relationships with 7 Prime Banking Institutions with a view to ensuring we have a global platform for the movement and management of funds regarding our petroleum activities. This is fundamental as without such clearance Remus would not be able to execute its petroleum transactions effectively or manage the underlying assets day to day. The Banks are aware of our strategy, and in the main have been very supportive. The SIZEABLE nature of finance with regards to Oil Transactions necessitates that we have the right BANKING RAILTRACK in place at all times.

CEO Comments

I have over the last 2 years had the privilege of meeting and working with some incredible people who have been both supportive and generous to our initiative. It has been a humbling journey thus far with many challenges. I wanted to say a word of thanks to all concerned and especially to those who continue to provide unwavering support.

Have we achieved all we sought to in the last 24 months? No, we have not. However, the progress made since Jan 2018 is significant and is due to the hard work of many members of the team. We continue to build the foundations as best we can with the skills and resources we have available to us. I see STEP CHANGES occurring in 2020 as we conclude Phase 1.0 of the Remus Health story and I hope to share some of those exciting developments with you in the coming months.

“VITTORIA AMAT CURAM” – Victory Loves preparation.....

Thank You

Sath Kanagarajah
